A. Kernel shapes
Uniform
Triangular
Epanechnikov
Gaussian
K(u)
u
B. Same data, different bandwidths
h = 0.25
h = 0.7
h = 1.5
Gaussian KDE
x
C. Pointwise AMSE at x = 0
Squared bias
Variance
AMSE
Optimal h = 0.8223
Approximate error
h
D. Boundary correction (Uniform, h = 0.2)
True exponential density
Expected ordinary KDE
Expected reflection KDE
Density / expectation
x >= 0
